The District Collector of Bellary..

Sir,

Ref:- Mining - Lease - Manganese - Bellary District. - Gunda Reserve - Suspension of Dead rent - The Bellary Manganese Mining Company.

Petition on behalf of the Bellary Manganese Mining Company most respectfully showeth:-

The petitioner is the lessee of Gunda Reserve in Hospet Taluk covering an area of 1503 acres 16 cents for working manganese. The lease was granted on 20th January 1927.

2. On account of the unfavourable character of the mining market, the Company was not able to work the mine satisfactorily. The petitioner has till now spent an enormous amount in trying to bring the mine into a working order.

NOTE.- All Contracts and Agreements are subject to fire Strike, Rains, Epidimics. break-downs to Machinery, Government and Railway restrictions and all other causes beyond our control, Errors are subject to correction
All communications to be address to the Proprietor

3. The mining industry is in a most unsatisfactory condition now-a-days owing to some disturbances in Europe many important iron, steel manufacturies are closed. Also on account of exports of ---- Manganese ore from Russia and other parts of the world the Manganese trade in India began to fall from about five years and today the industry has completely collapsed. Even in the Central Provinces where the --- industry was in a most flourishing condition, the biggest mine owners have been obliged to close all their mining operations. The present -- state of things is such that European firms which have direct dealings with European markets in the matter of selling their ore, are obliged to shut down their mining operations to a large extent. The manganese market began to decline about 4 years ago and today the condition is deplorable indeed. There is absolutely no market for any successful business operations of the mines. The Indian mining enterprises are subjected to great calamities from which it is impossible for them to extricate themselves unless and until Government comes to their aid. Apart from the closure of the mines, huge stocks of manganese ore are lying unsold all over the country and it is impossible, as some experts have held even to recover half the capital spent in producing the ore.

NOTE.- All Contracts and Agreements are subject to fire Strike, Rains, Epidimics. break-downs to Machinery, Government and Railway restrictions and all other causes beyond our control, Errors are subject to correction
All communications to be address to the Proprietor

4. In the above circumstances, the Company petitioned to the Collector on 29-10-1930 (copy enclosed) explaining the several difficulties under which the Company is suffering and requested him to refund the dead rent already paid and to waive further recovery for some time to come. The Collector in his letter No. 6469/30, dated 26-12-30 informed me that it was not possible to refund the dead rent while the mine was being worked under a sub-lease but suggested that the obvious course if the mine could not be worked at a profit, was to apply for the cancellation of the lease or if the present depression was only temporary to apply for suspension of the condition that I would work it, in which case he would recommend that dead rent should not be levied during the period of suspension. I submitted a petition accordingly and the Collector --- informed me in his letter No. 403/31, dated 1-3-1931 that the Board was pleased to suspend for two years some of the conditions of the lease.

pp 11-15 c.7

5. In his letter No. C. 3837/ dated 7-1-32 the Collector -- further informed me that the Board in B.P.Mis. 4118, dated 23-12-31 stated that the orders issued in its proceedings No. Mis. 570, dated 16-2-31 -- authorised only the suspension of the working of the area granted to me on lease and that dead rent should be collected under rule 50 (ii).

6. The present order of the Collector was great shock to me in view of the present economic depression and the slump in the --- manganese mining market.

7. I respectfully venture to submit that the Board's orders are ungenerous in view of the fact that I have paid already to Government a sum of Rs about 6750/- by way of dead rent besides a huge outlay over the mining work without getting anything by way of return for the amount and labour spent, and I have not sold even an ounce of manganese from this area in all the five years from the time the lease was taken. Prior to to the grant of the lease I was holding the concession on a prospecting license for two years and during this period I have paid a further amount of about Rs 1500/- without even realising even a pie from then concern.

8. As compared with the ore of the Central Provinces and elsewhere, the ore in the mine is decidedly inferior as the percentage of manganese is far below 35%. Such ores are properly termed "Magnefero ironores" rather than manganese ores. But the dead rent fixed at Re 1 - an acre was unduly heavy. This would not be felt if there was a boom in

the mining market. I am placed in an unfortunate position as there is not even a demand for high gade ore.

9. Where there is failure of crops whether by natural causes or otherwise, the Government have always been generous to grant either suspension or remission to the ryot. The Government have also recognised that the prosperity and happiness of the ryot, the peasant and the land owning classes is very dear to their heart.

10. In the circumstances, I feel it but fair that the dead rent due by may be remitted or suspended. Considering the hard times due to economic causes and slump in the mining market, I request that the Board will take a generous view and revise its orders.

11. Till final orders are passed, I request that the collection of dead rent may be stayed.

I beg to remain,
Sir,
Your most obedient servant,

proprietor

Copy of the letter addressed to the District Collector, Bellary, dated 29-10-1930.

To

The District Collector,
BELLARY.

Sir,

Mines - Manganese - Gundu %-Reserve - Hospet Taluk.

I have the honour to report that the period of three years for which the lease deed in in respect of the above property was transferred in favour of Mr.Shiva Rao Narayan Arur, B. A., L.L. B., of Dharwar, expired on 30-8-30 and the property automatically reverted to my favour with effect from the last day of that month.

Before making any attempt to start mining operations as per the terms of the lease deed, I have to request you, at this stage, to recommend to government certain factors that retarded progressive development of the above concession, which are submitted below in a sympathetic and liberal spirit.

Manganese industry which had already passed four years of unparallell depression, the decline in prices without any prospect of recovery ahead is a crowning misfortune. Orders at Home and abroad have gone to competitors, both foreign and inland, and buyers are not keen in entering into contracts ahead. The reasons for this are not far to seek. A close --- comparison of prices of Indian Manganese ore from 1927 would show that they were on the decline. Taking the prices from the year 1926 to 1930, I see in this space of time several periods of price movements in which the pendulum has always swung in the opposite direction. During these periods both production and consumption have been increased by systematically --- controlled prices, apparently controlled and monopolised by the three major sources of world's suppliers, namely, Russia, West Africa and Gold Coast and Brazil, who worked exclusively on the principle of obtaining the greatest possible advantage from their special position without regard to the production costs of the ore

13

As a matter of fact, the main Manganese Market are virtually under the shadow of this monopoly.

Now, coming to the United Kingdom Markets, there was a complete absence of demand due to the damping down of ferro-manganese furnaces for upwards of a year in 1926 during the coal strike. The supply of Manganese ore suitable for making ferro-manganese was a matter of concern to British Steel Makers as the deposits in the Caucasus at Nicopol and in West Africa and Brazil were not under British control, and the only available source of supply was from India. This led to the formation of a Company under the name of and style of "The United Kingdom Ferro-Manganese Company Limited" who entered into an agreement with the Central Provinces Manganese Mining Syndicate- the owners of the most richest and extensive Manganese deposits in India for a steady and adequate supply of suaitable ore at an arranged price. Apart from this it was further agreed and understood that the Ferro-Manganese Makers are to purchase their requirements from the United Kingdom Ferro-Manganese Company, who, in their turn should buy from the Ferro-Manganese Makers the whole of their production at an arranged price and should sell them for the benefit of the ferro-manganese Makers and the Central Provinces Manganese Mining Syndicate. Thus, the United Kingdom markets wre virtually brought under the control of the Central ~~Central~~ Provinces Manganese Mining Syndicate, and, as a result of these small mine owners lost the outlet for their product, both in the Foreign and United Kingdom Markets.

To add to these crowning misfortune, there was also complete absence of any leading principles of general application which constitute an important indication as to the trend of prices in the future, which is worth considering in relation to the extremely low grade and quality of the ore so far met with in the area covered by the lease deed. A few analysis certificates submitted herewith would certainly disclose what the value of the deposits would be. The quantity of ore mined so far, namely, about 6000 tons or thereabouts, represents a negligible fraction of the entire mass of ore bodies on the top level, possessing not more than 39 per cent of metallic Manganese content, with a corresponding high percentage of the

15

injurious elements, viz., Iron, Silica, and Phosphorus. The various trial pits taken during the course of prospecting and development have given sufficient indication of the probable ratio of the marketable ore to coutry rock, which after making due allowances for all untoward contingencies, such as yielding of b/ barren ground, top matrix cap or dead material, supporting wall or partitions, loss through accidental bad working, waste of small and dust, neglect of silicious ore etc., etc. and taking the exact location to be not less than 15 feet below the surface, would not come to anything more than 10 per cent of the entire area of 1503.16 acres covered by the lease deed.

The facts enumerated above coupled with the lack of any payable ore on the top level, the enormous expenses involved in resorting to underground mining under adverse mak market conditions, the impracticability in reducing the production costs by reason of the peculiar situation of of the deposits in an almost waterless tract on hills of high elevation rendering them almost inaccessible in many cases, the difficulty of haulage and transport paucity of labour and the unfitness of local labour for actual underground mining operations, the gk high freight cost, and above all the uncertainty as the quality, grade and available quantity of ore at depths has rendered the economic exploitation of the ore occurrences a difficult problem and an expensive undertaking.

Under these circumstances, I have no other alternative but to seek Government protection. I know that it is the --- declared policy of Government to foster and stimulate the mineral resources of this Presidency. Apart from this, an industry like mining has a claim to more liberal treatment than any other --- industry which deals with the production of primary necessities, by the very reason that mineral is a wasting asset and that it could not be replaced when once it is removed. I would therefore suggest that Government might well pause and consider, whether with a wasting asset such as Manganese ore is, its ultimate interests are really served by pressing development beyond its economic justification from time to time merely in a desire for royalty revenue.

17

The amount of fixed Half yearly rent fixed, is therefore a heavy burden on the industry and any future enforcement of payment of this sum will simply add to the burden of the losses which the industry is bearing. Due to the adverse factors and the depressed market conditions, the individual and well-thought-out operations of the past 4 years have not in the least contributed so far anything by way of profit, atleast, to cover the interest on the --- enormous amount of capital invested in developing the property. On the contrary the payment of Dead Rent every six months up to date, from out of the capital investment, is nothing short of -- discharging the obligations which was imposed on the lessee, irrespective of whether he has to meet the demand from out of the profits of his legitimate efforts and risks undertaken, or, from his own capital investment. The future of the industry depends upon Government support and hearty co-operation. I would therefore request you to be kindly pleased to recommend to Government to waive the Dead Rent until such time as the market conditions improve and the property is brought to that stage capable of producing ore suitable to meet an adequate and steady demand.

I would further request you to kindly recommend for the refund of atleast three-fourth, if not in full, the amount of the said rent paid so far, by taking into consideration the fact that it was paid out of the capital invested and not from any profit realised, and that the amount was fixed at the time of granting the lease without taking into consideration the actual value of the deposits and the degree of development made at that time, which fact can be better judged now not only from the few analysis certificates submitted herewith , but also from the enormous quantity of developed ore found unsalable and neglected at the mine and elsewhere outside the area. Further, I need hardly submit that the losses which Government may incur, is simply made by extra taxes, or by maintenance of taxes which would otherwise have been remitted; but the lessee, who is also a trader, has no such source from which to make up his -- losses which he sustains through unforeseen circumstances such as

low price, higher production costs, absence of demand, and, on the t
top of his losses, has to make up, by extra taxes, for the -----
Government losses. . Hence I have no other alternative but to
pray for a refund as indicated above, just to recoup to some
extent the loss of capital invested so far, and in doing so,
I have confined my claim only to that limit to which I am in all
fairness entitled to taking due care not to encroach even to the
slightest degree upon the liberality of Government under existing
circumstances, and as such, any refusal on the part of the ---
Government to grant my prayers would be nothing short of
leaving the untapped mineral resources of the area in the unfortu-
nate position of one, who has sacrifised a large part of its ---
wealth on an unwilling market and has shaken the foundation upon
which its measurments of prosperity has always rested.

I am the only man working the mine in this District
at present, and all other mines except mine have have practically b
been either closed down or abandoned. I feel confident that you wil
take a broader view on the present depressed state of the world's
manganese markets, and even if somewhat late, my plea for broad-
minded, sympathetic and liberal policy will not be unavailing.

I have the honour to be,

Sir,

Your most obedient servant,

(Sd.) K. A. Hye.

Mining leases - Manganese - (Bellary) - Hospet Tk - Gunda reserve - Suspension of dead rent - Khan Sahib K. Abdul Hye - Petition

K. 453/32 - - - - - pp 1-9 c.f.

To A.S. (Sett.)

Pl. see the petition from K. Abdul Hye at pp 1-9 c.f.

P.S. of (S) 2/ In its Progs. No. S 70 of 16.2.31. the Board approved the Coll's proposal to suspend the lease for manganese for 2 years mining granted to the petitioner. This was

para 6 p. 7 c.f. apparently understood by the pet^r and

p. 1 c.f. of (Z) also by the Coll^r that the pet^r was

4118 Mins 2.3.12 S exempted from the payment of dead-rent during the period of those two years. This fact came to the Bd's notice in

- Do - indirectly in connection with the Case of the Mysore Dev. Syndicate and the Bd informed the Coll^r that dead-rent should be collected though the lease had been suspended - Vide

pp 3 & 4 c.f. of (Z) para 2 of the Bd's P. at (Z). The present pet^n is the outcome of that order. The pet^r has not urged any special points not already considered by

by the Board. It draws an analogy - p9 c f
between the remission or suspension
of land revenue and the dead rent
suspension of
He requests that the Collection of dead - do -
rent may be stayed till final orders
are passed on the present petition.

The question of suspending the - pp 2-4 N-F ij (Z)
Collection of dead rent was considered
at length in connection with the
request of the advocate on behalf of the
Mysore Dev. Syndicate and it was
decided that the rules do not permit - Bf 3697 Misc 20-11-31 (P)
such a step being taken. In (in bottom file)
the circumstances, it appears that the
Bd. cannot intervene on behalf of the
pet:. Further, even granting that on
appeal, the Govt. allow such a concession,
which is doubtful, it is subd that there
will be no objection to refund the
amount collected. The safer course is
to collect the amounts as it falls due
rather than allow it to accumulate and
then take special steps to collect
large arrears. In the circumstances
there appears to be no reason to order
the stay of proceedings for the collection of
dead rent.

The Board agrees with the above

above view the pet^{r} may be directed to submit a certified copy of the order the review whereof is sought and the pet^{n} considered on its merits in due course.

Should not the exemption to the pets be stamped under the B.S.'s Pet^{n} Rules?
